

Our responsible AI principles

DXC Office of AI

We are transparent.

DXC values trust and is open about our responsible use of AI. This includes collaborating with our customers to address their needs and to provide them with a clear understanding of:

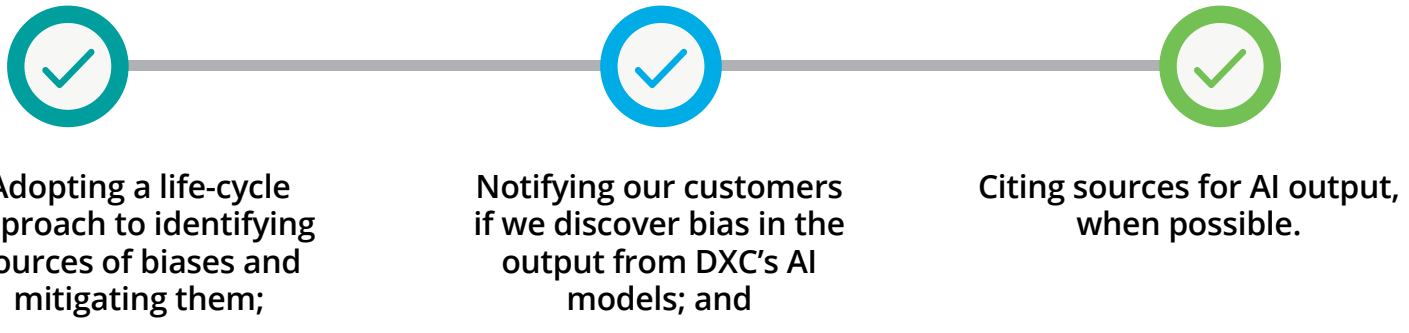

We are ethical.

At DXC, we believe in doing the right thing. We follow our corporate ethical standards when using AI and remain vigilant of the evolving AI regulatory landscape.

We are inclusive.

DXC fosters a culture of inclusion and fairness — and the same applies to our use of AI. We listen to our customers and help them to avoid discrimination when using AI. Specifically, DXC actively seeks to prevent, remove or reduce the impact of embedded biases in our AI output by:

We respect privacy.

Protecting the privacy of our customers, partners and employees is of the utmost importance to DXC. When using AI, we will continue to comply with applicable privacy laws and regulations.

We are secure.

At DXC, we promote data security and integrity, which empowers our customers, partners and employees to make decisions with confidence. We continuously strengthen our security measures using AI and deliver AI solutions that are resilient to cyber threats and vulnerabilities.

We are reliable.

We do what we say we are going to do. We continuously improve the assessment and testing of our AI tools and leverage proven patterns when delivering AI solutions.

We are human.

DXC takes a human-centric approach in the development and use of AI. We incorporate empathy, common sense and human oversight into our AI solutions at every stage of the process and emphasize augmenting human abilities.

We are human.

- We are **transparent.**
- We are **secure.**
- We are **ethical.**
- We **respect privacy.**
- We are **inclusive.**
- We are **reliable.**
